XGM Lite frame · floor plan 1:1

Box outside 270.7 × 244 mm, seen from above with the board's components facing up. Print at 100 % (actual size), never "fit to page".

Lay the real board, card and PSU on their outlines to check the fit before printing anything.

100 mm: check this bar with a ruler before trusting the page

Numbered markers

1. USB-C opening in the rear wall
2. window in the rear wall for the card's display ports
3. notch for the laptop cable, open at the bottom of the rear wall
4. rear wall: vents over the cable bay
5. far wall: opening for the PSU's power inlet and switch
6. far wall: exhaust grille for the card
7. wall above the PSU: PSU intake grille
8. wall below the card: intake grille for the card's fans
9. 24-pin plug and its sleeved bend: keep this area clear
10. bracket holder, standing in the board's three small holes
11. bracket line: the bracket's foot drops into the board's slot
12. cradle under the card's far end
13. clip for the laptop cable's rubber grommet
14. the laptop cable's taped harness runs along this edge
