

XGM Lite frame · floor plan 1:1

Box outside 270.7 × 244 mm, seen from above with the board's components facing up. Print at 100 % (actual size), never "fit to page".
Lay the real board, card and PSU on their outlines to check the fit before printing anything.

100 mm: check this bar with a ruler before trusting the page

Numbered markers

- | | |
|--|--|
| 1 USB-C opening in the rear wall | 8 wall below the card: intake grille for the card's fans |
| 2 window in the rear wall for the card's display ports | 9 24-pin plug and its sleeved bend: keep this area clear |
| 3 notch for the laptop cable, open at the bottom of the rear wall | 10 bracket holder, standing in the board's three small holes |
| 4 rear wall: vents over the cable bay | 11 bracket line: the bracket's foot drops into the board's slot |
| 5 far wall: opening for the PSU's power inlet and switch | 12 cradle under the card's far end |
| 6 far wall: exhaust grille for the card | 13 clip for the laptop cable's rubber grommet |
| 7 wall above the PSU: PSU intake grille | 14 the laptop cable's taped harness runs along this edge |
